INTRODUCTION

Junior Full-Stack Web Developer building practical web applications with React, Next.js, TypeScript, Node.js, and MongoDB. Focused on developing reliable user interfaces, backend APIs, and database-driven features.

TECHNICAL SKILLS

Languages & Frontend:	JavaScript (ES6+), TypeScript, React.js, Next.js, HTML5, CSS3, Tailwind CSS, Material UI, Framer Motion
Backend & APIs:	Node.js, Express.js, RESTful APIs, GraphQL, Authentication (JWT, Google OAuth), Zod Validation
Databases & State:	MongoDB, MySQL, Mongoose, Redux Toolkit, Context API
Real-Time & Testing:	Socket.io, Jest, React Testing Library, Vitest
Tools & DevOps:	Git, GitHub, Postman, Docker, Vercel, Netlify

TECHNICAL PROJECTS

POS Management System

Next.js, TypeScript, Node.js, Express, MySQL

A point-of-sale system designed to support product management, sales operations, cashier access, and store administration.

- Designed the system architecture and documented the main functional requirements and workflows.
- Structured the backend into separate routing, controller, service, repository, and validation layers.
- Implemented the initial authentication flow using Express, MySQL, bcrypt, and Zod.
- Designed the database structure and API responsibilities to support user management, product operations, and sales features.

[GitHub Repository](#)

E-commerce Platform

React, TypeScript, Redux Toolkit, Node.js, MongoDB

A responsive e-commerce platform for browsing products, managing a shopping cart, and interacting with product-related features.

- Built reusable user interface components for product browsing and shopping interactions.
- Implemented product filtering, search, cart management, and favorites functionality.
- Used Redux Toolkit and Context API to manage application state.
- Developed backend functionality for handling products and e-commerce data.

Social Media Platform

React, Node.js, Express, MongoDB, Socket.io, Cloudinary

A social media platform that allows users to create profiles, publish posts, and interact with other users through social features.

- Built user profiles and post creation functionality supporting text and media.
- Implemented interactions such as likes, comments, and hashtags.
- Integrated media uploads using Cloudinary.

- Added real-time functionality using Socket.io for interactive user experiences.
- Implemented authentication using JWT and Google OAuth.

EDUCATION

Full-Stack Web Development Certificates

Remote Academy

Completed intensive training covering Front-End, Back-End, and Full-Stack Web Development.
